

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1 - 19. (cancelled)

20. (currently amended) A wooden material wall, ceiling, or floor panel, including a wooden substrate and a multiple surface coating applied at least on a front side, said surface coating being a multiple layer surface coating comprising parts thereof, which multiple surface coating comprises at least one layer of transparent plastics, wherein the at least one layer of transparent plastics borders onto a layer of varnish or a layer of paint or pigments and has having a Shore hardness A from 20 up to 90, wherein the at least one layer of transparent plastic borders on a layer of varnish or a layer of paint or pigments and wherein the at least one layer of transparent plastic has a thickness between 20  $\mu\text{m}$  and 300  $\mu\text{m}$  and wherein the at least one layer of transparent plastics is a non-externally exposed layer.

21 - 27. (cancelled)

28. (currently amended) The wooden material panel according to claim 20, wherein said at least one layer of plastics comprises at least one layer containing at least one thermoplastic material.

29. (currently amended) The wooden material panel according to claim 20, wherein said at least one layer of plastics comprises

at least one layer containing a mixture of plastics including at least one thermoplastic material.

30. (previously presented) The wooden material panel according to claim 20, including at least one layer of plastic made of at least one of a polyolefin, a reactive polyolefin, a polyurethane, an ethylene-vinyl-acetate, polyester, an epoxide, and mixtures thereof.

31. (currently amended) The wooden material panel according to claim 20, wherein said at least one layer of a plastics is filled with at least one of a mineral, or an organic filler, and a color.

32. (cancelled)

33. (previously presented) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 40  $\mu\text{m}$ .

34. (previously presented) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 70  $\mu\text{m}$ .

35. (previously presented) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 100  $\mu\text{m}$ .

36. (previously presented) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 150  $\mu\text{m}$ .

37. (previously presented) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 250  $\mu\text{m}$ .

38. (cancelled)

39. (cancelled)

40. (currently amended) The wooden material panel according to claim 20, wherein at least two layers of plastics have been applied onto the wooden material panel.

41. (currently amended) The wooden material panel according to claim 20 40, wherein the at least one layer of plastics is applied onto ~~a~~ each main surface of at least said front side of the wooden material panel.

42. (currently amended) The wooden material panel according to claim 20, wherein at least two layers of plastics have been applied onto at least one main surface of the wooden material panel.

43. (currently amended) The wooden material panel according to claim 42, wherein between the at least two layers of plastics at least one layer of another material having a different Shore hardness A is provided.

44. (currently amended) The wooden material panel according to claim 38 20, wherein the at least one layer of plastics borders onto a layer of synthetic resin.

45. (previously presented) The wooden material panel according to claim 44, wherein the layer of synthetic resin is a varnish layer.

46. (cancelled)

47. (currently amended) The wooden material panel according to claim 38 20, wherein the at least one layer of plastics has been coated onto a layer of bonding agent.

48. (currently amended) The wooden material panel according to claim 38 20, further comprising a layer of bonding agent applied onto the at least one layer of plastic.

49. (currently amended) The wooden material panel according to claim 20, wherein the at least one layer of plastics is elastic and resumes its original shape after a mechanical load is removed which had resulted in a deformation.

50 - 65. (cancelled)

66. (new) The wooden material panel according to claim 20, wherein the at least one layer of plastic has a thickness from 20  $\mu\text{m}$  to 300  $\mu\text{m}$ .
